FOR KENTUCKY—Probably thur-
derstorms Tuesday.

Rains are checking the forest fires of the northwest. It is estimated that the loss will be about six millions of dollars, and that one dozen persons had perished.

A local option election has been ordered in Richmond, Ky., to be held March 3, 1910. This means eight months of excitement for Clarence Woods, the dry leader of the Bluegrass, who lives in Richmond.

Word has been received at Blue fields that five hundred of Madriz's troops were killed in an engagement with the troops under the command of Estrada, at Nagua, where Estrada is said to be cutting a wide swath.

Gov. Willson has received and accepted the resignation of W. A. Blackburn as county judge of Crittenden county. He has appointed Carl Henderson, of Marion, to the vacancy. Judge Blackburn succeeds John R. Puryear as clerk of the Federal Court at Paducah.

The outcome of the judicial contest in Tennessee which closes August 4, is conceded to be very doubtful. The contest is between a ticket of regular or Patterson Democrats and Independent Democratic ticket. The Republican vote will be divided, the negroes supporting the Patterson ticket.

New World's Record.

It remained for the Missouri College of Agriculture at Columbia, Missouri, to raise and develop the Champion Dairy Cow of all the world. Missouri Chief Josephine, a Holstein-Friesian cow finished her six months test on July 18th, producing 17,008 8 pounds, an average of 93.4 pounds of milk daily for 182 days. This is equivalent to 46 7/8 quarts, or 11 1/2 gallons every day. Her highest record for one day was 110 1/2 pounds. This record is the more remarkable because no special preparation had been made for this test and Josephine has done her full duty in the regular dairy herd of the University, having had five calves in five and one-half years.

Not only has this record smashed all previous world's records for milk production, but the per cent. of butter fat is increasing daily, so that harring accidents this cow will undoubtedly produce more butter during a period of twelve months than any other cow that has ever been tested in the world.

This cow is but one of a number of remarkable cows owned by the University of Missouri and maintained solely for the instruction of its students in Agriculture and for investigational purposes. Only twenty Jersey cows in the history of the world have produced more than 700 pounds of butter in one year. Five of these cows, or 25 per cent of the total number, are owned and were bred by this Missouri institution. The College owns more than 300 pure bred and registered animals, belonging to 17 distinct breeds.

Josephine's record exceeds the present world's record for six months by 1458 pounds.

Mrs. W. S. Davison is very ill at her home on Walnut street.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surface of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for testimonials.

To Retire From Head of the Democratic Committee.

"When ought we to go
to the Dentist?"

Many think it unnecessary to devote particular attention to the teeth until the mouth is affected by broken or decayed teeth. Others give their teeth no attention until pain compels them. Every one who thinks a moment on the subject knows that we cannot masticate our food satisfactorily, if one of the teeth is tender, inflamed or other wise out of order, and that if this be the case, the mouth requires immediate attention.
